

# Men's Ministry Group – Project Request Application

Requests for the Men's Ministry Group to participate in a project are facilitated by this application. Projects are defined as any work requiring skilled to non-skilled construction; cleanup and landscaping capabilities.

The Group is open to supporting a wide variety of requests including:

1. **Local and Regional Projects** – examples could include campground/retreat work; infrastructure support for non-profits, community outreach efforts, etc.
2. Member and Neighbor support – examples could include repair and installation work for shut-in's, people with minimal resources requiring help, etc.
3. **Church Grounds and Facilities Projects**

Completing this request form does not guarantee participation by the Men's Ministry Group. Requests take approximately two weeks to process and are processed through the Group's Core Team. All requests should be turned into the Stone Church Office. If you have a time sensitive request let the Church Office know and every attempt will be made to consider the request within the time required.

You will be notified about the status of your request once a decision has been made.
